Abas Turabli

Senior Frontend Developer

Alicante, Spain • +34 665313016
me@abasturabli.com • linkedin.com/in/turabli

Results-oriented Senior Frontend Developer with 8+ years of experience delivering scalable, high-performance web apps across e-commerce, fintech, and media domains. Expert in React and modern JavaScript, with a strong record of transforming complex UI designs into fast, responsive, and maintainable applications. Passionate about performance optimization, clean architecture, and mentoring teams to deliver world-class user experiences.

Technical Proficiencies

HTML | CSS | JavaScript | TypeScript | ReactJS | Redux | NodeJS | React Native | NextJS | APIs (REST, GraphQL) | Web Services | Webpack | Bootstrap | MongoDB | Test-Driven Development (TDD) | Unit Testing (Jest) | Cypress | Sass | ECMAScript | JSON | GIT | NPM | Continuous Integration (CI) | UI Updates | Bug Fixes

Career Experience

Vollou – United Kingdom (remote)   07/2024 – Present
Senior Frontend Developer

Vollou is a London-based tech company revolutionising live music royalty tracking and reporting through cutting-edge audio recognition solutions.
Tech Stack: React JS, JavaScript, TypeScript, MUI, React Testing Library, Jest, Vitest

- Developed the dashboard frontend from scratch based on Figma designs using React as the core library.
- Integrated REST APIs and implemented Firebase Authentication for secure and seamless user access.
- Boosted app performance by 35% through optimized rendering and refactored components.
- Improved maintainability by structuring reusable components and enforcing clean, scalable code practices.

Tesco PLC – Czech Republic (remote)   04/2023 – 09/2025
Senior Frontend Developer

As a Senior Frontend Developer, led project planning and design in Agile teams, building responsive, cross-browser web apps with React. Architected frontend solutions from scratch and maintained clear project documentation for scalability and team onboarding.

- Led frontend architecture and delivery of scalable React applications in Agile environments.
- Developed reusable components using React hooks, Context API, and modern JavaScript (ES6+) and TypeScript.
- Integrated and documented a custom UI library to improve consistency.
- Ensured high performance, accessibility, and cross-browser compatibility.
- Maintained code quality with unit/integration testing (Jest, React Testing Library).
- Collaborated with cross-functional teams to align UI/UX with business requirements.

Wunderman Thompson Commerce – Portugal (remote)   09/2022 – 04/2023
Senior Frontend Developer

Implemented Google Tag Manager (GTM) functionality and enhanced development workflows using modern React practices. Fostered seamless collaboration with diverse teams, including designers and project management, facilitating the transformation of designs into operational websites.

- Engaged in code review processes.
- Completed Salesforce Commerce Cloud training.
- Translated Figma designs into responsive React applications
- Collaborated with designers and project managers for seamless delivery

The Independent – United Kingdom (remote)
Senior Frontend Developer   01/2022 – 09/2022

Created accessible and adaptable websites. Developed responsive user interfaces, optimizing user experience. Thrived in cross-functional teamwork; streamlined project management and successful task execution in liaison with developers, product managers, and designers.

- Enhanced overall user satisfaction by executing user testing methodologies.
- Acquired in-depth understanding of codebase nuances and adeptly utilized key third-party tools within a brief 6-month timeframe.
- Demonstrated invaluable contributions to team, ensuring consistent delivery of top-tier work, thereby enhancing the overall success of projects.

Cybernet LLC – Azerbaijan, Baku (hybrid)
Senior Frontend Engineer   03/2021 – 05/2022

Investigated and devised a resolution for project maintenance. Created new application form and electronic invoice within the current portal. Played integral role in a project serving a one-million-user base, actively engaged and operational.

- Improved client-side performance within the ongoing project.
- Utilized ReactJS (hooks), Redux-Saga, React Query, and more to advance project development.
- Facilitated collaboration among team members, optimizing teamwork and reducing interdependencies.
- Completed development tasks nearly 3× faster through pair programming.

NetGroup LLC – Azerbaijan, Baku (on-site)
Senior Frontend Developer   06/2020 – 03/2021

Architected internal projects employing React/React Hooks, Next .JS and Node JS. Facilitated numerous projects during tenure, fostering collaboration and growth within the organization. Provided mentorship to junior team members, offering guidance and conducting code reviews to enhance their proficiency.

- Attained 45% decrease in testing duration by developing test automation application.
- Implemented dynamic routing and data fetching with Next.js, optimizing user experience and reducing load times.
- Conducted code reviews and provided mentorship on Next.js best practices and patterns to ensure code quality and maintainability across the team.
- Elevated web project interactivity through integration of ThreeJS and ReactJS.

Caspiantech CJSC – Azerbaijan, Baku (on-site)
Frontend Developer   10/2017 – 05/2020

Utilized React JS, React Router, Redux JS, Webpack, styled components, and related technologies. Displayed Web Service (RESTFulAPI) data on interface.

- Designed architecture and implemented WebSockets within the project.
- Created reusable components and executed design concepts using ReactJS.
- Collaborated with designers and project managers to align UI with business goals
- Used React, React Router, Redux, Webpack, and styled components for scalable development

Education

GED (General Education Development)
Baku Regional Vocational Training School, Baku, (2013)
